TITLE: Cloud-Based Product Selling Application Using Zoho Creator

AIM: To create a simple cloud-based product selling application using Zoho Creator for managing customer orders, product details and total bill amount, and to demonstrate the Software as a Service model.

REQUIREMENTS: Internet connection, Web browser, Zoho Creator account, Computer or mobile device.

PROCEDURE:

- Open the **Zoho Creator** website and sign in using a Zoho account.
- Click **Create New Application** and select **Create from Scratch**.
- Enter the application name as **Online Product Selling System**.
- Create a form named **Product Order**.
- Add department options such as CSE, ECE, EEE, IT, Mechanical and Civil Engineering.
- Add product names such as Laptop, Mobile Phone, Headphones, Keyboard, Mouse and Smart Watch.
- Add product categories such as Electronics, Computer Accessories, and Mobile Accessories.
- Add payment options such as Cash on Delivery, UPI, Debit Card, and Credit Card.
- Add order status options such as New Order, Confirmed, Shipped, Delivered, and Cancelled.
- Open the **Workflow** section and create an input-field workflow for the **Quantity** field.
- Paste the Deluge script to calculate the discount amount and final total amount automatically.

IMPLEMENTATION:

The image shows two screenshots of a software interface. The top screenshot is a form builder for a 'Book Reservation' system. It features a left sidebar with various input field types like Name, Address, Phone, Email, Date, and Radio. The main area displays a form with fields for Name, Register Number, Department, Year of Study (highlighted), Email, Phone, Book Title, Author Name, Book Category, and Book ID. A right sidebar shows 'Field Properties' for the 'Year of Study' field, including its name, link name, and a list of choices (1st year, 2nd year, 3rd year, 4th year, MS/PHD). The bottom screenshot is a 'Deluge Script' editor. It shows a script for calculating the product price based on the product name. The script uses a series of 'if' and 'else if' statements to assign prices to different products like Keyboard, Mouse, Headphones, Webcam, USB Drive, and Laptop Stand. The script also includes a final check for null values for price and quantity.

Form Builder Interface (Top):

- Form Fields:** Name, Register Number, Department, Year of Study, Email, Phone, Book Title, Author Name, Book Category, Book ID.
- Field Properties (Year of Study):**
 - Field name: Year of Study
 - Field link name: Year_of_Study
 - Choices: 1st year, 2nd year, 3rd year, 4th year, MS/PHD

Deluge Script (Bottom):

```
1 if(input.Product_Name == "Keyboard")
2
3   input.Product_Price = 1500;
4 }
5 else if(input.Product_Name == "Mouse")
6 {
7   input.Product_Price = 700;
8 }
9 else if(input.Product_Name == "Headphones")
10 {
11   input.Product_Price = 2000;
12 }
13 else if(input.Product_Name == "Webcam")
14 {
15   input.Product_Price = 2500;
16 }
17 else if(input.Product_Name == "USB Drive")
18 {
19   input.Product_Price = 800;
20 }
21 else if(input.Product_Name == "Laptop Stand")
22 {
23   input.Product_Price = 1200;
24 }
25 if(input.Product_Price != null && input.Quantity != null)
26 {
```

Script Actions:

- Condition: if, else if, else, conditional if
- Data Access: add record, fetch records, aggregate records, update record, for each record, delete records
- Client Functions: focus

Buttons: Update, Cancel

OUTPUT:

Online Product Selling System

DELUGE CODE:

if(input.Product_Name == "Keyboard")

```
{
input.Product_Price = 1500;
}
else if(input.Product_Name == "Mouse")
{
input.Product_Price = 700;
}
else if(input.Product_Name == "Headphones")
{
input.Product_Price = 2000;
}
else if(input.Product_Name == "Webcam")
{
input.Product_Price = 2500;
}
else if(input.Product_Name == "USB Drive")
{
input.Product_Price = 800;
}
else if(input.Product_Name == "Laptop Stand")
{
input.Product_Price = 1200;
```

```
}  
if(input.Product_Price != null && input.Quantity != null)  
{  
    subtotal = input.Product_Price * input.Quantity;  
    if(input.Discount_Percentage != null)  
    {  
        input.Discount_Amount = (subtotal * input.Discount_Percentage) / 100;  
    }  
    else  
    {  
        input.Discount_Amount = 0;  
    }  
    input.Total_Amount = subtotal - input.Discount_Amount;  
}
```

RESULT:

Thus, a simple cloud-based product selling application was successfully created using Zoho Creator. The application stores customer and product order details and automatically calculates the discount amount and total bill amount. Since the application is accessed through the internet without installing separate software, it demonstrates the Software as a Service cloud model. model.
